SUMMARY

I'm a software engineer that cares about good practices and clean code. I'm a frontend specialist and I'm a React / Angular developer fully focused on React now. I've also done some backend in Java and PHP with frameworks.

EXPERIENCE

Javascript Developer

Rankmi.com

📅 06/2018 - Ongoing

- Developed components, modules and features from the most trivial, up to the most complex using Angular JS framework version 1.6.7.
- Refactored components from .js to .ts and made improvements over legacy code.
- Collaborated in creating and refactoring components to enable accessibility by limited or impaired users (WAI ARIA standards for the web).
- Learned React JS and collaborated in the migration of the application from Angular JS to React JS.

Fullstack Developer

Sotec Consulting

📅 06/2017 - 06/2018

- Developed components, modules and features using the Angular framework versions 2 to 5.
- Collaborated in REST API development using Spring Framework and Entity Framework with Microsoft SQL Server
- Involved in projects that used the SCRUM methodology for agile development.

SKILLS

HTML5	CSS3 / SASS	Javascript / ES6	Git	Github
React	Angular	Angularjs	Typescript	Bootstrap
Laravel	JQuery	Prettier	ES Lint	Font Awesome
Underscore / Lodash				

EDUCATION

Computer Engineering

Universidad de Oriente

📅 2010 - 2018 📍 Anzoategui, Venezuela

PROJECTS

Dental Clinic Management

📅 2010 - 2018

📍 Puerto la Cruz, Anzoategui, Venezuela

Application for appointments, clinic history, and administration of a dental clinic.

- Tools used: Jquery, Laravel Framework, Bootstrap 3, SVG, Raphael JS, MySQL.
- Featuring patient history including an interactive interface that displays the patient's teeth. Allows the user to display certain figures and color each section of each tooth individually as well.
