📍 Buenos Aires, Argentina

SUMMARY

I'm a full stack developer with more experience leaning towards the frontend with Angular and React. My backend experience includes PHP and Java. I'm also looking forwards to include NodeJS and related technologies to my skillset.

MOST RECENT EXPERIENCE

Fullstack Developer

PSH Digital Agency for Nearpod.com

📅 06/2021 - Ongoing

IT agency

- Nearpod is the biggest and most important client of the company and a top edtech platform in the US.
- First experience with team members in the US and constant communication in english.
- Revisited full stack development with React JS using a full Redux / Sagas architecture and PHP backend with the company's inhouse tooling and full unit tests on both sides of the stack.

Frontend Developer

Rankmi.com

📅 06/2018 - 06/2021

Human resources management plaform

- Developed components, modules and features from the most trivial, up the most complex using Angular JS framework version 1.6.7.
- Refactored components from .js to .ts and made improvements over legacy code.
- Learned React JS and collaborated in the migration of the application from Angular JS to React JS.

SKILLS

| HTML5 | CSS3 / SASS | Javascript / ES6 | Git | Gitlab |

| React | Angular | AngularJS | Typescript | Bootstrap |

| Laravel | JQuery | Prettier | ES Lint | Font Awesome |

| Underscore / Lodash | Jest / Enzyme | Mockery |

EDUCATION

Computer Engineering

Universidad de Oriente

📅 2010 - 2018   📍 Anzoategui, Venezuela

PROJECTS

Dental Clinic Management

📍 Puerto la Cruz, Anzoategui, Venezuela

Application for appointments, clinic history, and administration of a dental clinic.

- Tools used: Jquery, Laravel Framework, Bootstrap 3, SVG, Raphael JS, MySQL.
- Featuring patient history including an interactive interface that displays the patient's teeth. Allows the user to display certain figures and color each section of each tooth individually as well.

TRAINING / COURSES

Angular: Getting Started (2017)
